Zen Black

When it comes to dark interiors the luxurious black finish of Zen contributes to a professional, quality feel. Combined with a highly efficient performance, **Zen sets the benchmark when it comes to comfort control.**

Zen Silver

The silver Zen units are produced using highly advanced manufacturing processes, including the application of a special film coating to produce a stylish, contemporary finish. **The modern, chic colour choice offers an alternative option to conventional style room air conditioning.**

Zen White

The white Zen units blend in perfectly with light coloured interiors. The thin, stylish design expresses a sophisticated elegance and makes the units **perfect for any applications, large or small.**

The Elegant & Efficient Zen Series

The Zen Series is a wall mounted system that blends energy efficiency with a sophisticated, streamlined design.

Combining an impressively low power consumption with a quiet, yet powerful performance, units have a distinctively styled front panel that not only looks appealing, but also helps to make cleaning of the unit easier.

Designed to complement modern interior décor and suitable for a wide range of applications, Zen units blend in naturally wherever they are installed and are available in three striking colours; black, silver and white.

● Smartphone / Tablet control with MELCloud

MELCloud is a new cloud based solution for controlling your Mitsubishi Electric air conditioning system either by PC, Tablet or Smartphone.

Remote operation can be achieved as long as you have a connected system and you have an Internet connection at the location of your equipment and Internet connection on your PC, Smartphone or Tablet device.**

For further information please visit melcloud.com

Key Features

- **Energy Efficient Operation** - All Zen systems have an energy label of at least 'A+' and contribute to reduced energy consumption in shops, offices and a range of other settings. Available in a variety of capacities, all models produce a powerful performance with low starting and running currents to match.
- **Quiet Operation** - Zen indoor units feature a 'silent mode' fan speed setting that provides near silent operation as low as 21dBA (sizes 25/35). 
- **Weekly Timer** - Utilising a stylish infra-red remote controller or wired option all Zen indoor units feature a built in weekly timer for complete control at all times.
- **Filter Systems** - Zen indoor units make use of two types of filter. The Nano Platinum filter generates stable antibacterial and deodourising effects, while the optional Anti-Allergy Enzyme filter uses enzyme catalysts to filter allergens.
- **Replace Technology** - Zen incorporates 'Replace Technology' to allow the upgrade of R22 / R407c systems using existing pipework and wiring, without the need to apply any special cleaning operations. For further information visit replace.mitsubishielectric.co.uk 
- **Multi-Split Compatibility** - Zen is fully compatible with our range of M Series MXZ Multi-Split Systems, allowing up to 8 indoor units to be connected to a single outdoor unit, saving on pipework and installation time.
- **VRF Compatibility** - Zen is compatible with City Multi when used in conjunction with PAC-LV11M LEV kit.

* MAC-397IF required to connect to PAR-31MAA. ** MAC-557IF required to connect to MELCloud.
